DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse is acknowledged. The restriction requirement mailed 10-27-03 is withdrawn.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 31-65 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 9-30 of copending Application No. 09/652,216. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the pending claims are drawn to "forming" in a process "that which is formed" and claimed in the allowed application. Comparing the allowed claim 7 in application 09/652,216 to pending claim 31, the allowed claim is only distinguished in that elements present in the allowed device claim are "formed" in the pending method claims.

Art Unit: 2829

It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to form the elements of the device claimed in copending 09/652,216, because the elements are necessarily formed in a device if the device is to exist.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
